Chemistry and Physics of LIPIDS

Subject index

Volume 75 (1995)

Absorption; Autoxidation; Methyl linoleate; Micelles; UV irradiation; UV **75**, 127

Adjuvant; MDP; Glycyrrhetinic acid; Diphytanyl glycerol; Interferon γ; Macrophage; Pd deallylation **75**, 51

Alkyl oleates; Oleic acid; ^{13}C-NMR; HPLC **75**, 101

Alkylseleno; Synthesis; Phenylseleno; 1,3-Hydroxy-selena; Unsaturated selena fatty esters; Physical properties **75**, 71

Anesthetic; High pressure; 2D-NMR; Dipalmitoylphosphatidylcholine; Relaxation **75**, 59

ATP-citrate lyase inhibitor; DMPC; ^{19}F-NMR; Vesicles; Partitioning **75**, 93

Autoxidation; Methyl linoleate; Micelles; UV irradiation; UV; Absorption **75**, 127

Branched chain fatty acids; Phosphatidylcholine; Microcalorimetry; X-ray diffraction; Polymorphism **75**, 81

^{13}C-NMR; Oleic acid; Alkyl oleates; HPLC **75**, 101

Calorimetry; Molecular probes; Membrane bilayers; Lipids; Thermal phase transitions; Ideal solution theory **75**, 109

Chiral discrimination; Langmuir monolayer; Microscopy **75**, 163

Chiral surfactant; Langmuir monolayer; Fluorescence microscopy **75**, 155

Cyclic fatty acids; Silver ion chromatography; High-performance liquid chromatography; Gas chromatography; Mass spectrometry **75**, 171

2D-NMR; High pressure; Dipalmitoylphosphatidylcholine; Anesthetic; Relaxation **75**, 59

Differential scanning calorimetry; *N*-acylphosphatidylethanolamines; *N*-acyl chain length; ^{31}P-NMR spectroscopy; Fourier transform infrared spectroscopy; Gel-to-liquid crystal phase transition; Polymorphism **75**, 15

Dipalmitoylphosphatidylcholine; High pressure; 2D-NMR; Anesthetic; Relaxation **75**, 59

Diphytanyl glycerol; Adjuvant; MDP; Glycyrrhetinic acid; Interferon γ; Macrophage; Pd deallylation **75**, 51

DMPC; ^{19}F-NMR; Vesicles; Partitioning; ATP-citrate lyase inhibitor **75**, 93

DPH anisotropy; *N*-acylethanolamines; Ethanolamine derivatives; Trout erythrocytes; Hemolysis **75**, 97

Drug delivery; Fluorinated phospholipids; Perfluoroalkylated phosphocholines; Perfluoroalkylated glycerophospho-cholines; Fluorocarbon emulsions; Fluorinated vesicles; Liposomes **75**, 1

***E*-2-Octenal**; N^2-(Carbobenzyloxy)-L-lysine; Pyridinium salts; Reaction **75**, 43

Electrostatic interactions; Phospholipid; Phase transitions; Herbicides; Paraquat **75**, 137

Erythrocytes; Phospholipid probes; Transport; Phosphatidylserine **75**, 27

Ethanolamine derivatives; *N*-acylethanolamines; Trout erythrocytes; Hemolysis; DPH anisotropy **75**, 97

^{19}F-NMR; DMPC; Vesicles; Partitioning; ATP-citrate lyase inhibitor **75**, 93

Fluorescence microscopy; Langmuir monolayer; Chiral surfactant **75**, 155

0009-3084/95/$09.50 © 1995 Elsevier Science Ireland Ltd. All rights reserved

Fluorinated phospholipids; Perfluoroalkylated phosphocholines; Perfluoroalkylated glycerophospho-cholines; Fluorocarbon emulsions; Fluorinated vesicles; Liposomes; Drug delivery **75**, 1

Fluorinated vesicles; Fluorinated phospholipids; Perfluoroalkylated phosphocholines; Perfluoroalkylated glycerophospho-cholines; Fluorocarbon emulsions; Liposomes; Drug delivery **75**, 1

Fluorocarbon emulsions; Fluorinated phospholipids; Perfluoroalkylated phosphocholines; Perfluoroalkylated glycerophospho-cholines; Fluorinated vesicles; Liposomes; Drug delivery **75**, 1

Fourier transform infrared spectroscopy; *N*-acylphosphatidylethanolamines; *N*-acyl chain length; Differential scanning calorimetry; ^{31}P-NMR spectroscopy; Gel-to-liquid crystal phase transition; Polymorphism **75**, 15

Gas chromatography; Cyclic fatty acids; Silver ion chromatography; High-performance liquid chromatography; Mass spectrometry **75**, 171

Gel-to-liquid crystal phase transition; *N*-acylphosphatidylethanolamines; *N*-acyl chain length; Differential scanning calorimetry; ^{31}P-NMR spectroscopy; Fourier transform infrared spectroscopy; Polymorphism **75**, 15

Glycyrrhetinic acid; Adjuvant; MDP; Diphytanyl glycerol; Interferon γ; Macrophage; Pd deallylation **75**, 51

Gossypol; Infrared spectroscopy; Phospholipid interdigitation; Phospholipid dynamics **75**, 119

Hemolysis; *N*-acylethanolamines; Ethanolamine derivatives; Trout erythrocytes; DPH anisotropy **75**, 97

Herbicides; Phospholipid; Phase transitions; Paraquat; Electrostatic interactions **75**, 137

High pressure; 2D-NMR; Dipalmitoylphosphatidylcholine; Anesthetic; Relaxation **75**, 59

High-performance liquid chromatography; Cyclic fatty acids; Silver ion chromatography; Gas chromatography; Mass spectrometry **75**, 171

HPLC; Oleic acid; Alkyl oleates; ^{13}C-NMR **75**, 101

1,3-Hydroxy-selena; Synthesis; Alkylseleno; Phenylseleno; Unsaturated selena fatty esters; Physical properties **75**, 71

Ideal solution theory; Molecular probes; Membrane bilayers; Lipids; Calorimetry; Thermal phase transitions **75**, 109

Infrared spectroscopy; Gossypol; Phospholipid interdigitation; Phospholipid dynamics **75**, 119

Interferon γ; Adjuvant; MDP; Glycyrrhetinic acid; Diphytanyl glycerol; Macrophage; Pd deallylation **75**, 51

Langmuir monolayer; Chiral discrimination; Microscopy **75**, 163

Langmuir monolayer; Chiral surfactant; Fluorescence microscopy **75**, 155

Lipid/surfactant mixture; Phase structure; ^{31}P and ^{2}H NMR and model membrane **75**, 145

Lipids; Molecular probes; Membrane bilayers; Calorimetry; Thermal phase transitions; Ideal solution theory **75**, 109

Liposomes; Fluorinated phospholipids; Perfluoroalkylated phosphocholines; Perfluoroalkylated glycerophospho-cholines; Fluorocarbon emulsions; Fluorinated vesicles; Drug delivery **75**, 1

Macrophage; Adjuvant; MDP; Glycyrrhetinic acid; Diphytanyl glycerol; Interferon γ; Pd deallylation **75**, 51

Mass spectrometry; Cyclic fatty acids; Silver ion chromatography; High-performance liquid chromatography; Gas chromatography **75**, 171

MDP; Adjuvant; Glycyrrhetinic acid; Diphytanyl glycerol; Interferon γ; Macrophage; Pd deallylation **75**, 51

Membrane bilayers; Molecular probes; Lipids; Calorimetry; Thermal phase transitions; Ideal solution theory **75**, 109

Methyl linoleate; Autoxidation; Micelles; UV irradiation; UV; Absorption **75**, 127

Micelles; Autoxidation; Methyl linoleate; UV irradiation; UV; Absorption **75**, 127

Microcalorimetry; Phosphatidylcholine; Branched chain fatty acids; X-ray diffraction; Polymorphism **75**, 81

Microscopy; Langmuir monolayer; Chiral discrimination **75**, 163

Molecular probes; Membrane bilayers;Lipids; Calorimetry; Thermal phase transitions; Ideal solution theory **75**, 109

***N*-acyl chain length**; *N*-acylphosphatidylethanolamines; Differential scanning calorimetry; ^{31}P-NMR spectroscopy; Fourier transform infrared spectroscopy; Gel-to-liquid crystal phase transition; Polymorphism **75**, 15

***N*-acylethanolamines**; Ethanolamine derivatives; Trout erythrocytes; Hemolysis; DPH anisotropy **75**, 97

***N*-acylphosphatidylethanolamines**; *N*-acyl chain length; Differential scanning calorimetry; ^{31}P-NMR spectroscopy; Fourier

transform infrared spectroscopy; Gel-to-liquid crystal phase transition; Polymorphism **75**, 15

N^2-(Carbobenzyloxy)-L-lysine L; *E*-2-Octenal; Pyridinium salts; Reaction **75**, 43

Oleic acid; Alkyl oleates; ^{13}C-NMR; HPLC **75**, 101

^{31}P and ^{2}H NMR and model membrane L; Lipid/surfactant mixture; Phase structure **75**, 145

^{31}P-NMR spectroscopy; *N*-acylphosphatidylethanolamines; *N*-acyl chain length; Differential scanning calorimetry; Fourier transform infrared spectroscopy; Gel-to-liquid crystal phase transition; Polymorphism **75**, 15

Paraquat; Phospholipid; Phase transitions; Herbicides; Electrostatic interactions **75**, 137

Partitioning; DMPC; ^{19}F-NMR; Vesicles; ATP-citrate lyase inhibitor **75**, 93

Pd deallylation; Adjuvant; MDP; Glycyrrhetinic acid; Diphytanyl glycerol; Interferon γ; Macrophage **75**, 51

Perfluoroalkylated glycerophospho-cholines; Fluorinated phospholipids; Perfluoroalkylated phosphocholines; Fluorocarbon emulsions; Fluorinated vesicles; Liposomes; Drug delivery **75**, 1

Perfluoroalkylated phosphocholines; Fluorinated phospholipids; Perfluoroalkylated glycerophospho-cholines; Fluorocarbon emulsions; Fluorinated vesicles; Liposomes; Drug delivery **75**, 1

Phase structure; Lipid/surfactant mixture; ^{31}P and ^{2}H NMR and model membrane **75**, 145

Phase transitions; Phospholipid; Herbicides; Paraquat; Electrostatic interactions **75**, 137

Phenylseleno; Synthesis; Alkylseleno; 1,3-Hydroxy-selena; Unsaturated selena fatty esters; Physical properties **75**, 71

Phosphatidylcholine; Branched chain fatty acids; Microcalorimetry; X-ray diffraction; Polymorphism **75**, 81

Phosphatidylserine; Phospholipid probes; Erythrocytes; Transport **75**, 27

Phospholipid; Phase transitions; Herbicides; Paraquat; Electrostatic interactions **75**, 137

Phospholipid dynamics; Gossypol; Infrared spectroscopy; Phospholipid interdigitation **75**, 119

Phospholipid interdigitation; Gossypol; Infrared spectroscopy; Phospholipid dynamics **75**, 119

Phospholipid probes; Erythrocytes; Transport; Phosphatidylserine **75**, 27

Physical properties; Synthesis; Alkylseleno; Phenylseleno; 1,3-Hydroxy-selena; Unsaturated selena fatty esters **75**, 71

Polymorphism; *N*-acylphosphatidylethanolamines; *N*-acyl chain length; Differential scanning calorimetry; ^{31}P-NMR spectroscopy; Fourier transform infrared spectroscopy; Gel-to-liquid crystal phase transition **75**, 15

Polymorphism; Phosphatidylcholine; Branched chain fatty acids; Microcalorimetry; X-ray diffraction **75**, 81

Pyridinium salts; N^2-(Carbobenzyloxy)-L-lysine; *E*-2-Octenal; Reaction **75**, 43

Reaction; N^2-(Carbobenzyloxy)-L-lysine; *E*-2-Octenal; Pyridinium salts **75**, 43

Relaxation; High pressure; 2D-NMR; Dipalmitoylphosphatidylcholine; Anesthetic **75**, 59

Silver ion chromatography; Cyclic fatty acids; High-performance liquid chromatography; Gas chromatography; Mass spectrometry **75**, 171

Synthesis; Alkylseleno; Phenylseleno; 1,3-Hydroxy-selena; Unsaturated selena fatty esters; Physical properties **75**, 71

Thermal phase transitions; Molecular probes; Membrane bilayers; Lipids; Calorimetry; Ideal solution theory **75**, 109

Transport; Phospholipid probes; Erythrocytes; Phosphatidylserine **75**, 27

Trout erythrocytes; *N*-acylethanolamines; Ethanolamine derivatives; Hemolysis; DPH anisotropy **75**, 97

Unsaturated selena fatty esters; Synthesis; Alkylseleno; Phenylseleno; 1,3-Hydroxy-selena; Physical properties **75**, 71

UV; Autoxidation; Methyl linoleate; Micelles; UV irradiation; Absorption **75**, 127

UV irradiation; Autoxidation; Methyl linoleate; Micelles; UV; Absorption **75**, 127

Vesicles; DMPC; ^{19}F-NMR; Partitioning; ATP-citrate lyase inhibitor **75**, 93

X-ray diffraction; Phosphatidylcholine; Branched chain fatty acids; Microcalorimetry; Polymorphism **75**, 81
